

We create spaces.
Temporarily, or for a lifetime.

Passionate about superior craftsmanship. Since 1962.

Winkels Interior Design Exhibition plans and implements premium interior concepts for brands, products and properties. We develop interior design at all scales and with high-quality design and craftsmanship. For temporary purposes, or for a lifetime.

We have been working with renowned brands and customers for more than five decades, but we're still down-to-earth, good-humoured Lower Rhinelanders.

Founded	1962
Staff	75
Premises	30.000 sqm²
Manufacture & warehouse	18.000 sqm²
Solar panels	3.158 sqm²

We feel home in all kind of spaces.

It all started with constructions for exhibitions and trade fairs. Superb craftsmanship, wide-ranging knowledge of materials and the reliable meeting of deadlines form the basis of our many years of expertise.

Nowadays, we develop and realise interior concepts wherever high-quality interior design is required: in shops, showrooms, offices, museums, hotels, private residences or yachts – and for you too!

Dallmer GmbH & Co. KG / Bau 2019
design: Meiré und Meiré GmbH

BMW Group / IAA Mobilität 2021
design: Meiré und Meiré GmbH

BSH Haushaltsgeräte GmbH / Showroom Löhne 2020
design & photo: 1zu33 GmbH

Store of a premium fashion brand

Our services

consulting

We offer you a **non-binding initial consultation** in which we contribute our knowledge of material, feasibility and possibilities. We prefer focusing on sustainable solutions.

competence

Winkels is home to specialist interior design consultants as well as highly skilled **planners, architects, carpenters, painters and logistic experts**. We have international and interdisciplinary know-how and we are proud of the high level of satisfaction among our longstanding customers.

capacity

On our 30,000 sqm premises - with our own state-of-the-art **CNC-controlled production** and a comprehensive warehouse management system with component tracking – we realize even the largest projects safely and quickly.

quality

Our solid team of versatile and truly **brilliant specialist craftsmen** combines the latest technology with traditional craftsmanship, thus achieving a particularly **high vertical range of manufacture** and thus unique **in-house quality**.

For us, sustainability isn't just a word,...

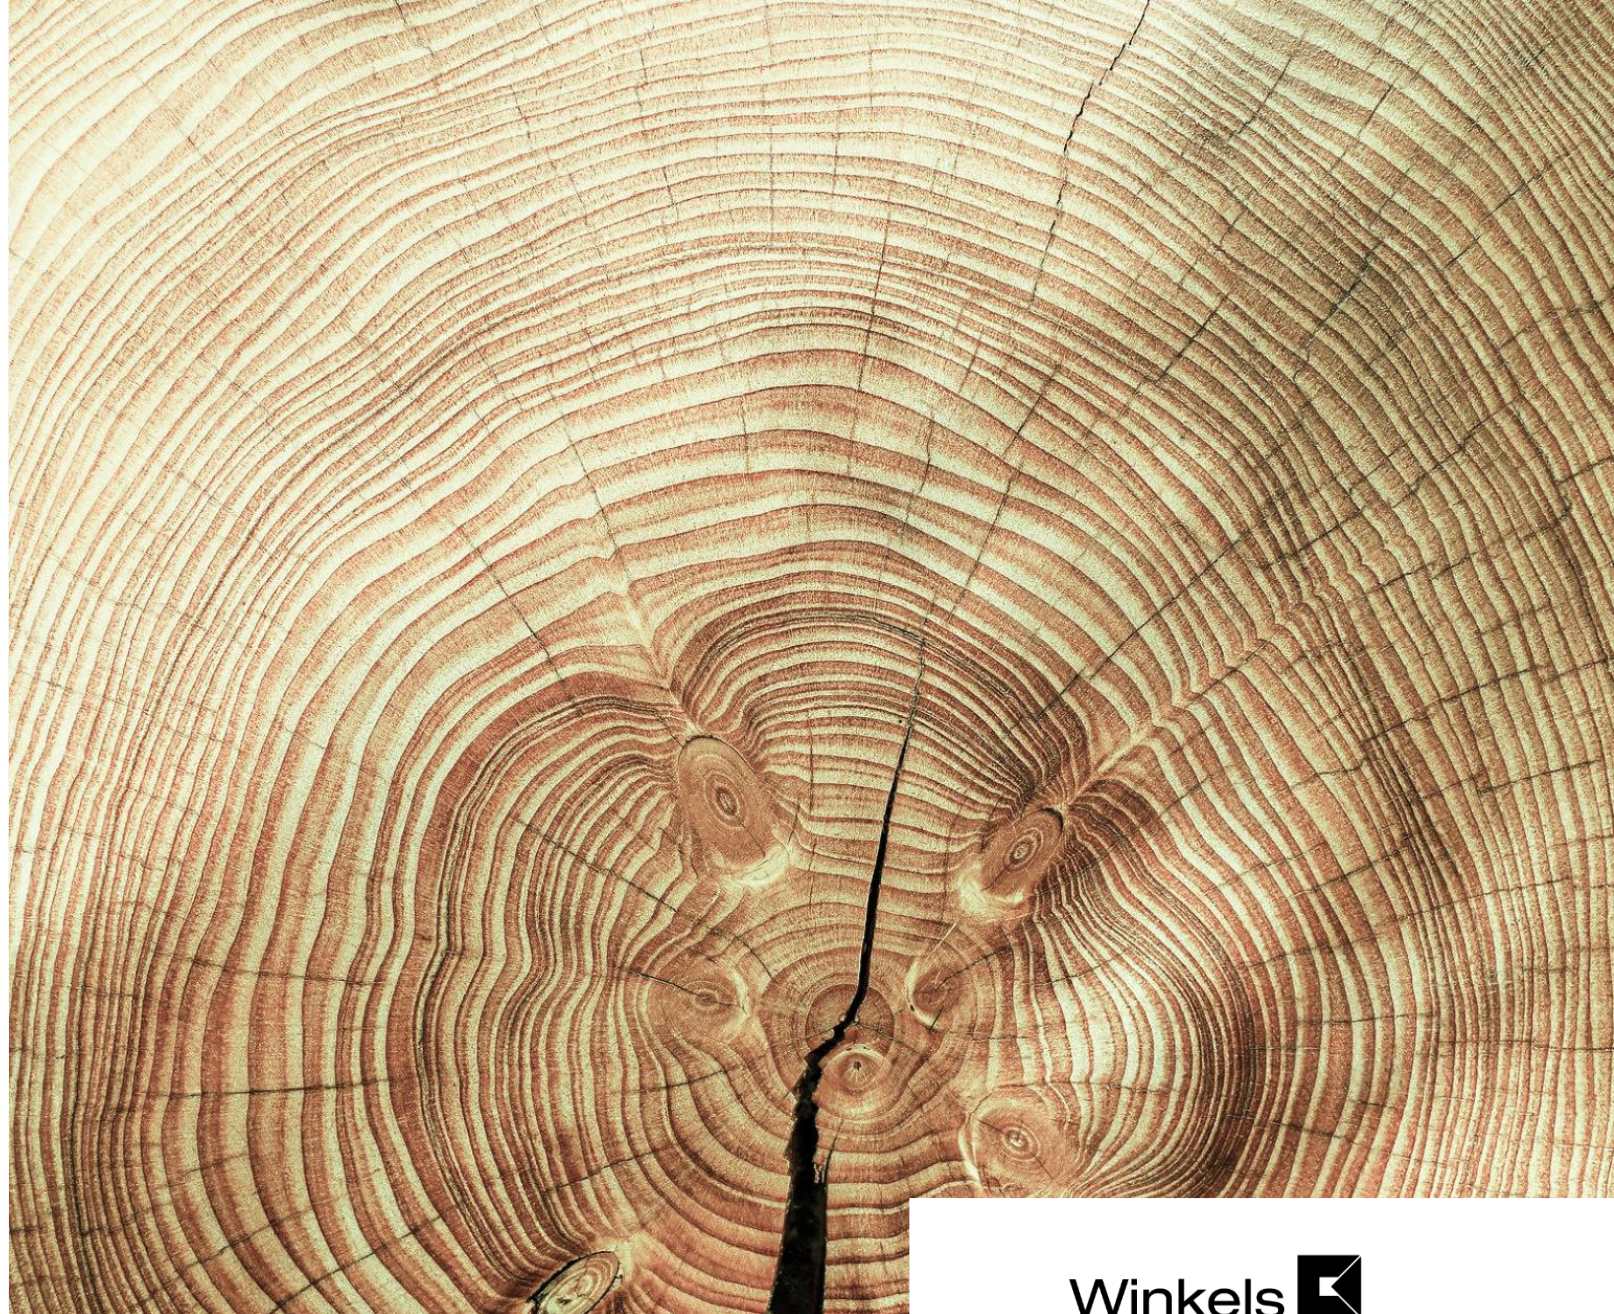

Internally, we rely on sustainable energy management, an electric vehicle fleet, our willingness to invest in terms of quality and durability, resource efficiency in waste and recycling management, our own bee pastures, job bikes and much more.

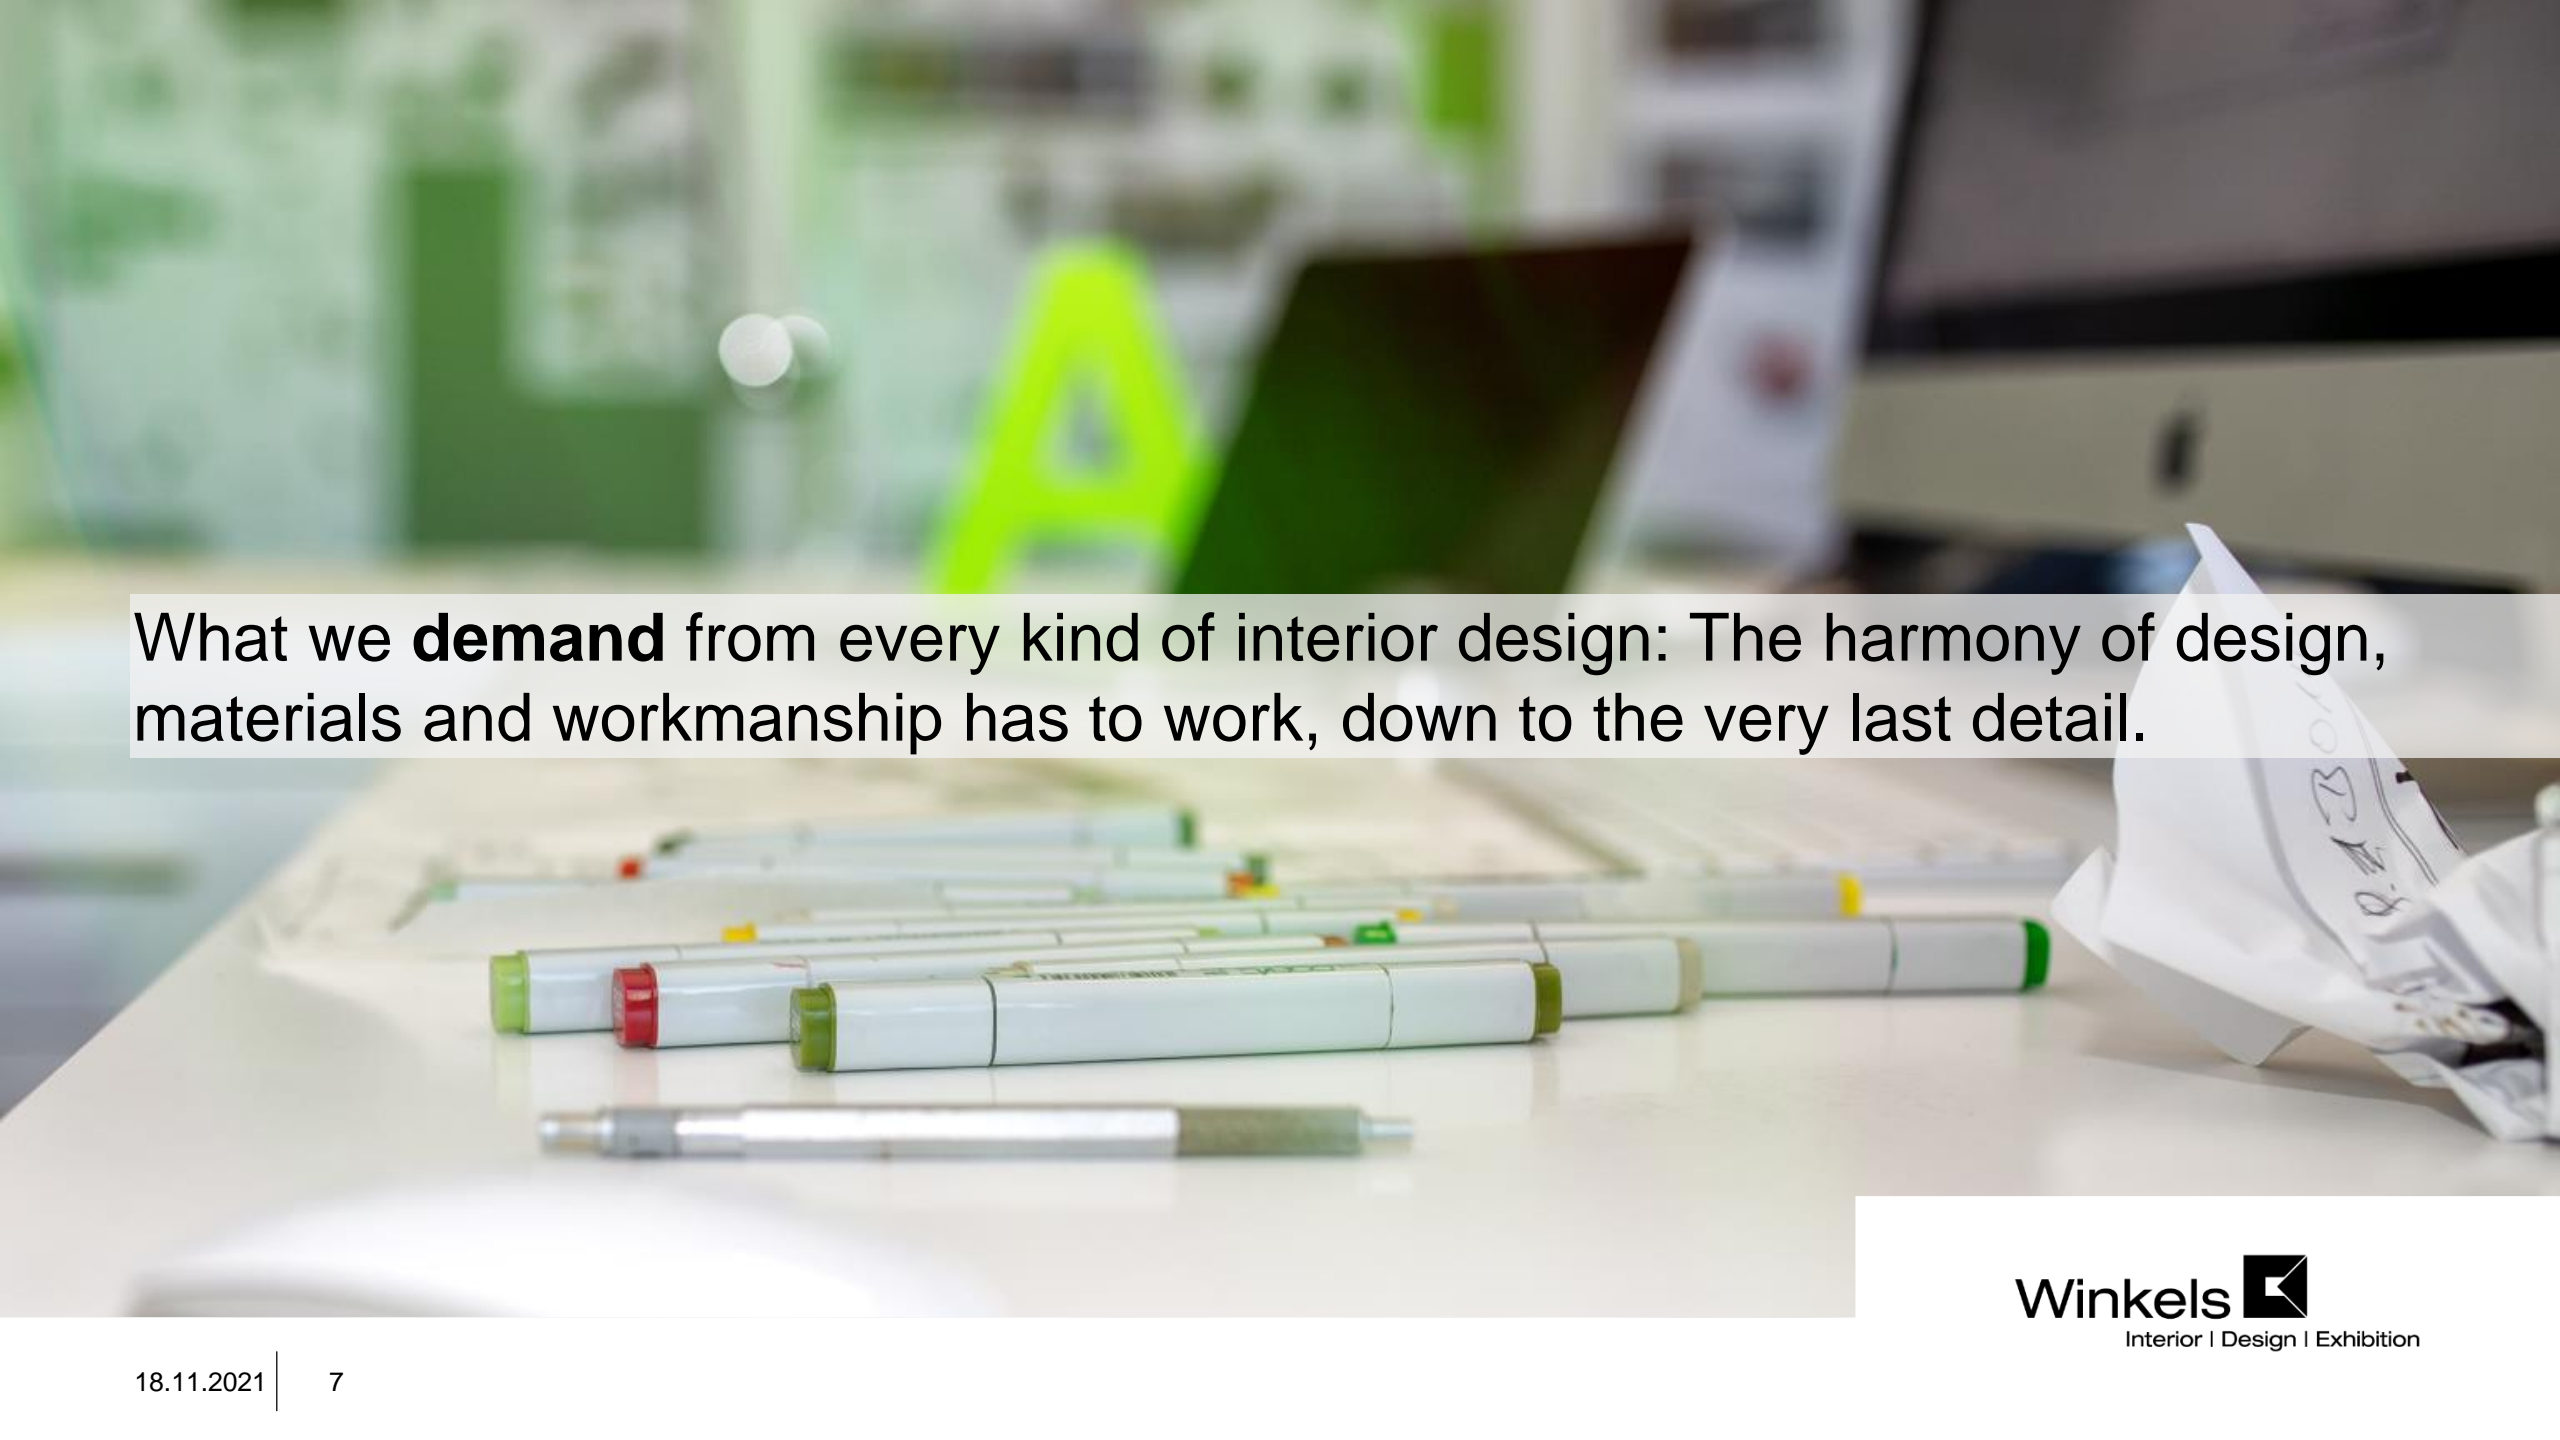

Together with you, we would like to focus on other relevant approaches: a reduced and efficient use of materials, the relevance of the product origin, a long-term suitable design with regard to multiple use, the integration of component elements, modular system parts, "light" constructions, and much more.

...it's a value!

Temporary production and sustainability? We want to make these two topics more compatible. We commit ourselves to this with our environmental management system according to **DIN 14001**, our certification as a "**sustainable company**", above all with our conscience.

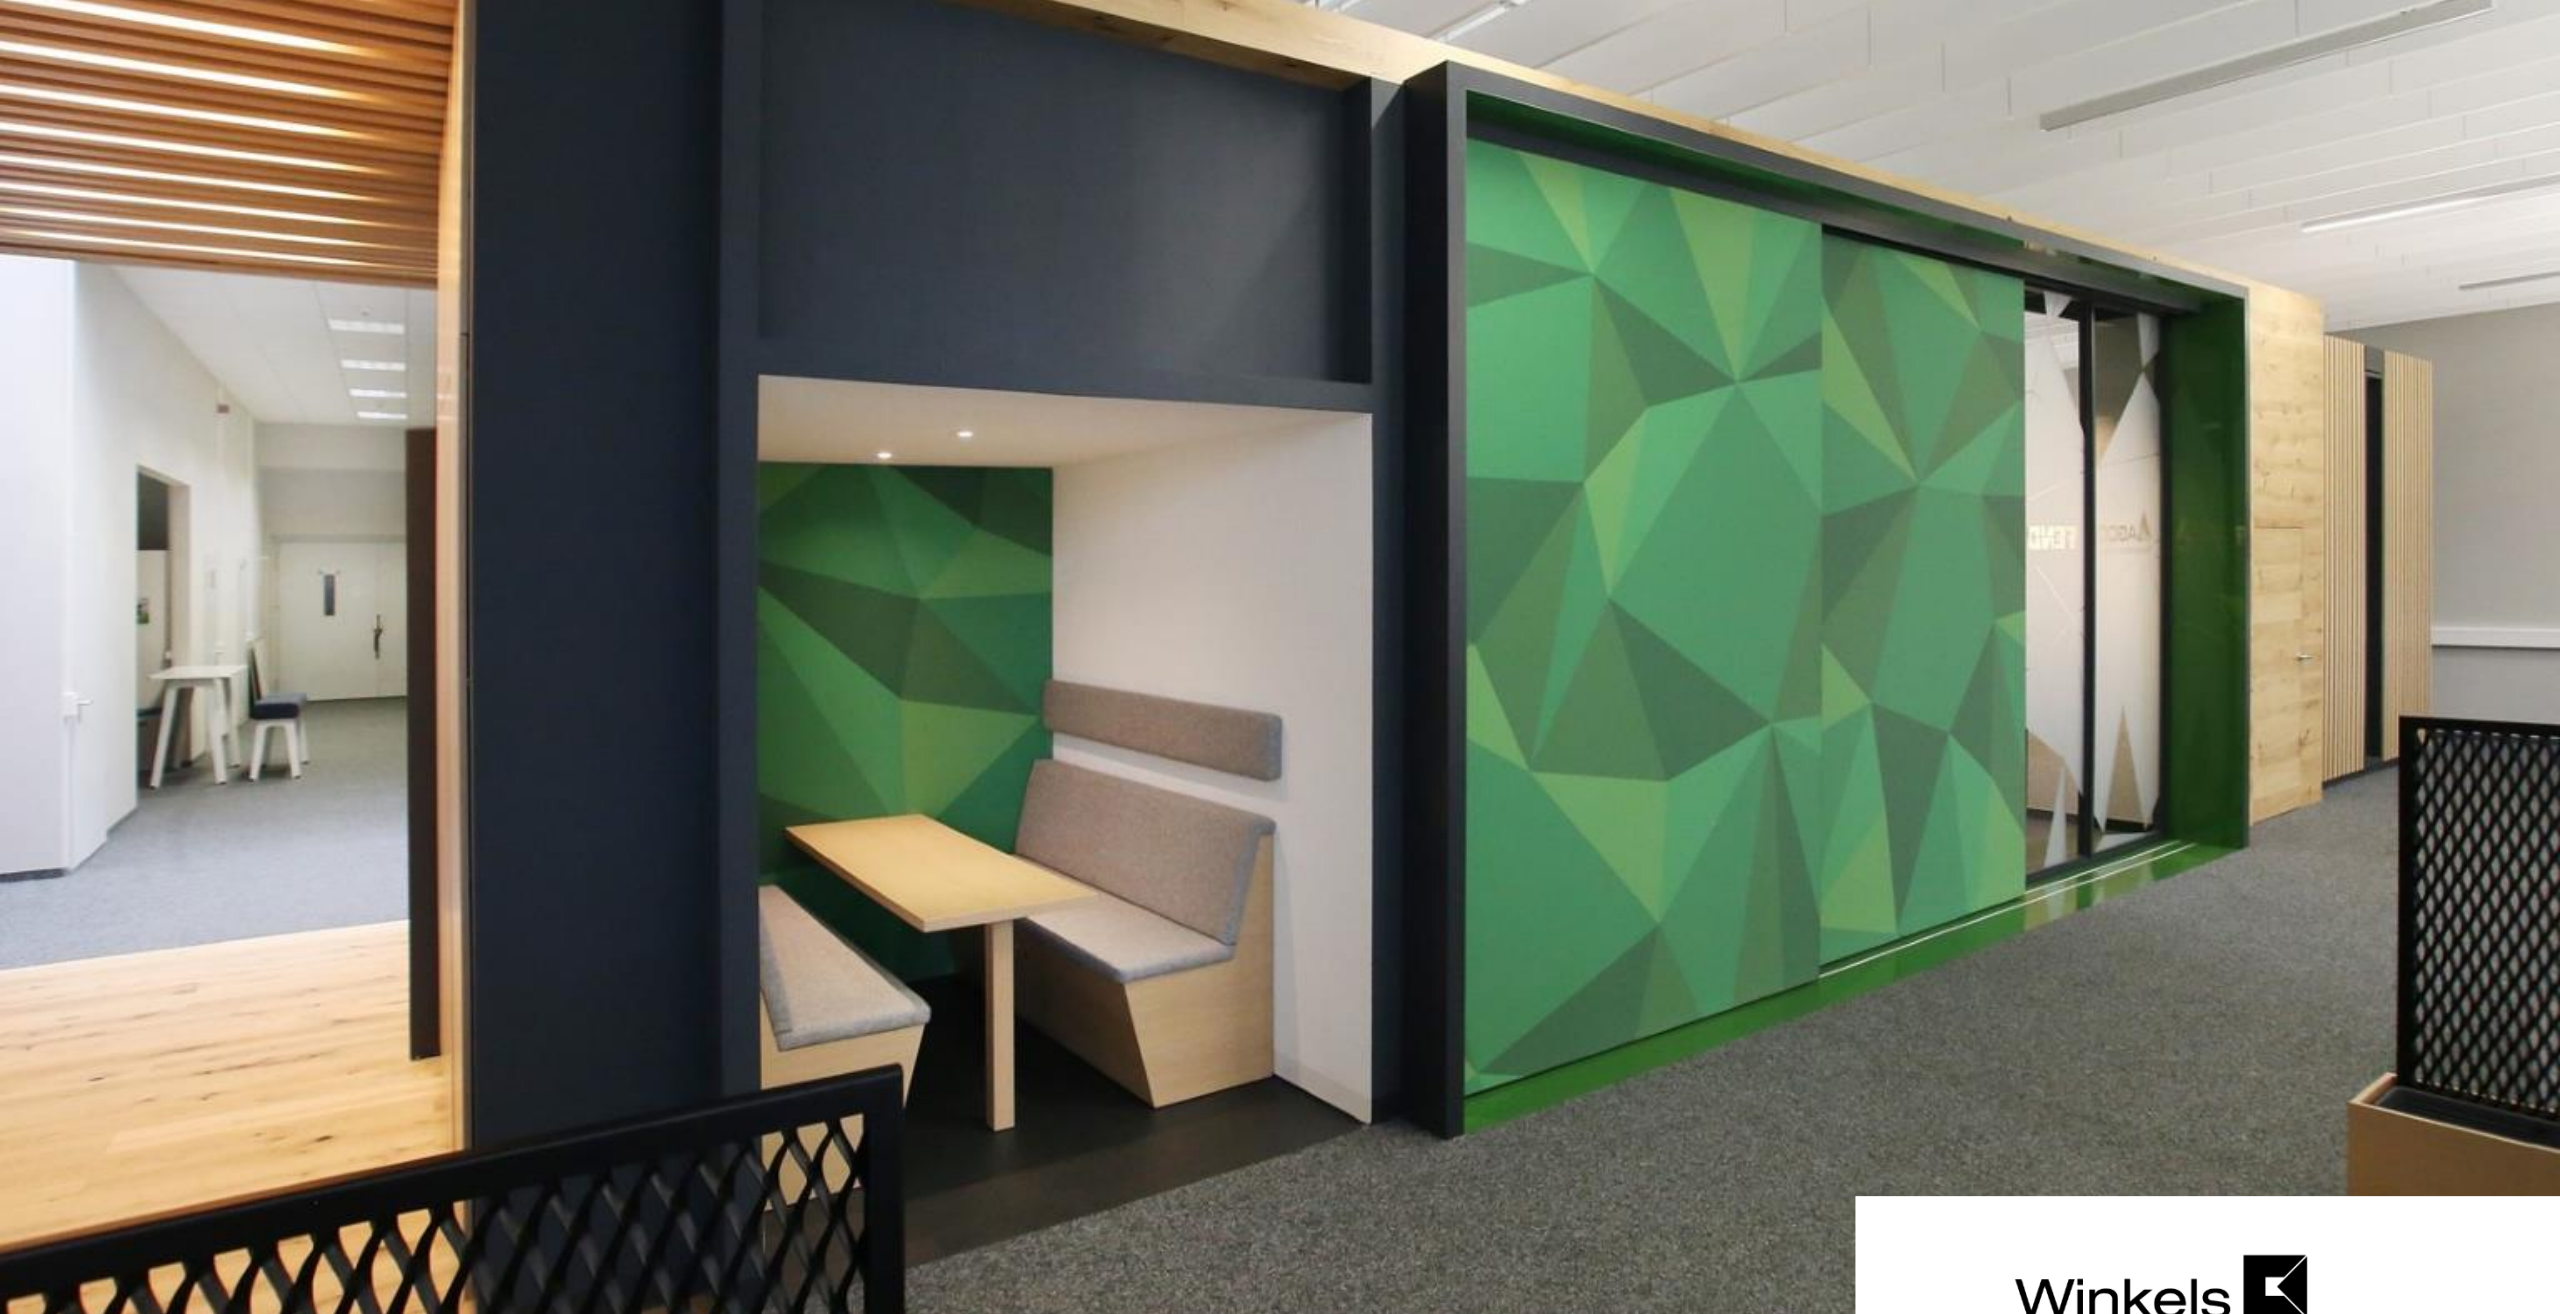

What we **demand** from every kind of interior design: The harmony of design, materials and workmanship has to work, down to the very last detail.

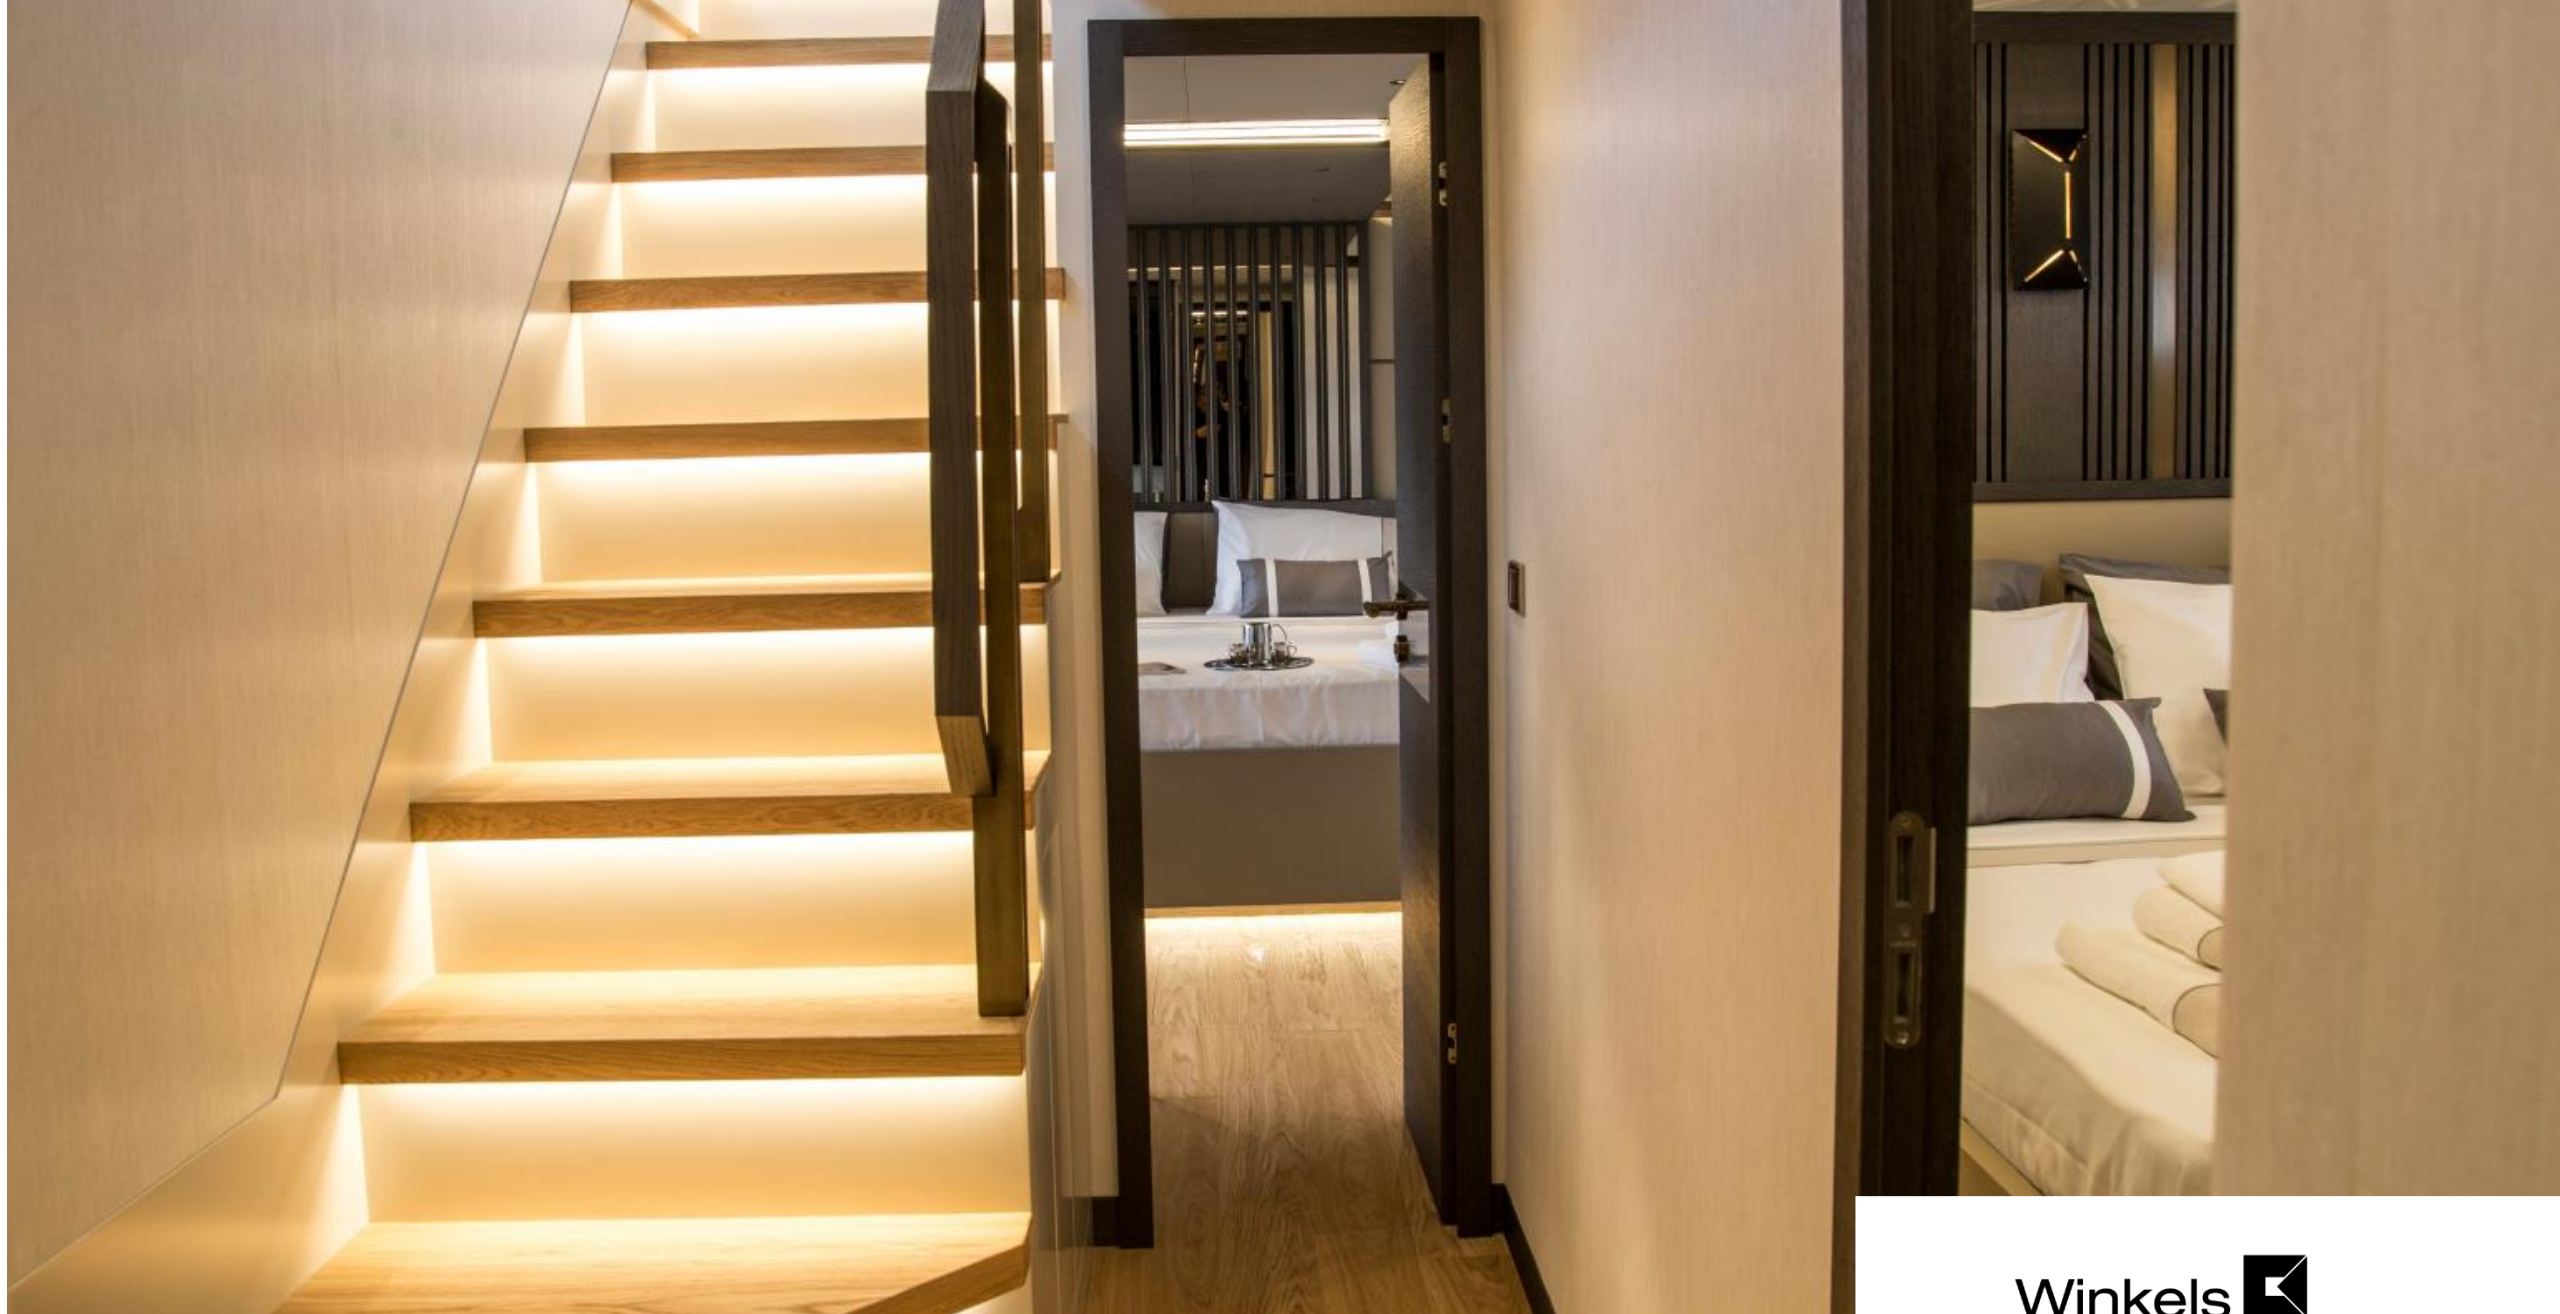

We are fascinated by the idea of allowing people to shape the lightscapes of their personal space, using light to enhance their quality of life.
We create a new culture of light.

Our **demand** for quality guides us at every stage of the process and is justified by the results we achieve.

Consulting

We support you with initial assessments, on the topic of material selection, sustainability, feasibility and deal in detail with your requirements and objectives. In doing so, we benefit not only from our experience-based competencies, but also from our broad network, e.g. in the areas of hygiene, hybrid and success measurement.

Concept / Design

Our credo is: More is always possible. Form, colour, material and representational digital techniques are therefore virtuously combined in interdisciplinary teams. From floor plans and hand drawings to 3D renderings and detailed concept development. The result is high-quality, individualised and special room planning. With exquisite and always innovative material suggestions.

Project planning

In our project management, we combine many years of planning experience with specialist technical and logistics knowledge. Every step of manufacture is monitored in detail.

Manufacture

Our solid team of versatile and truly brilliant specialist craftsmen combines the latest technology with traditional craftsmanship, thus achieving a particularly high vertical range of manufacture and thus unique in-house quality.

Capacities

For our customers, we afford things which others do not: an in-house paintshop, dedicated workshops for carpentry and metalwork, lighting and electrical engineering, and a large materials warehouse. This allows us to work quickly, flexibly and with the utmost in precision and individualisation. And all this on our 30,000 sqm premises, with our own state-of-the-art CNC-controlled production and a comprehensive warehouse management system with component tracking. This enables us to carry out even the largest projects safely and quickly.

Capacities

State-of-the-art CNC machines for 5-axis machining with extraordinary machining dimensions (L 7,200 x W 2,500 x H 450 mm)

Full-size panel processing (up to 2,000 x 5,600 mm) in all the thicknesses which are available

Two modern paintwork rooms for all types of painting processes (water wall / positive pressure room)

Material stocking with **fully automated panel storage** ('chaotic' storage, sorting on request)

Fully automated edge banding machine with PU bonding (highest-quality procedure)

Warehouse management system with component tracking

Comprehensive services in the fields of **woodwork, metalwork and electrical installation**

At our company site in Kleve, we have space for the design of individual architectures, home environments and worlds of experience, as well as for all kinds of designs and constructions, whatever the industry and application. In addition to storage, our spaces also offer you the opportunity to carry out trial assemblies and test runs of your room and brand worlds. We would be pleased to invite you to a plant tour.

We look forward to hearing from you!
